BOARD OF DIRECTORS

CAPITAL SOCIAL

COMPOSITION

Issued share capital : 1,000,000,000 XOF
Published Capital : 1,000,000,000 XOF
Paid up capital : 1,000,000,000 XOF

Comment :

As a SARL, it is made up of cash contributions and all of the shares are fully subscribed and paid up and helped by the sole partner Mr. NANTOUME. The share capital would have increased from 1,000,000 XOF to 1,000,000,000 XOF in 2023 but we have not yet received the amending RCCM.

SECTORAL ANALYSIS

Sectoral Analysis :

The mining subcontracting sector is booming with the proliferation of mining companies in Mali. The players are well-structured entities and demand is growing and the clients are good.

COUNTRY RISK

Political data :

Mali has been going through a period of instability and conflict since the 2012 military coup and the occupation of the north by armed groups. The United Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA) has been active since July 2014. Following the institutional breakdown that occurred on August 18, 2020, a transitional government and a National Transitional Council (CNT), serving as the National Assembly, were put in place pending the organization of democratic elections. Colonel Assimi Goïta was proclaimed Head of State on May 28, 2021 by the Constitutional Court. Meeting on 3 July 2022 at an ordinary summit in Accra, ECOWAS Heads of State decided to lift the financial and trade sanctions imposed on Mali and accepted the date proposed by the transitional government for a return to civilian rule in March 2024. However, the Summit prohibited the transitional authorities from participating in future elections and maintained individual sanctions targeting certain members of the regime. Following consultations between the government, political parties and civil society held in Bamako on June 28, 2022, a detailed timetable for reforms, legislative and presidential elections was adopted. The first and second rounds of the presidential election will take place in February 2024. The first and second rounds of the legislative elections are scheduled for October and November 2023. A constitutional referendum was scheduled for March 2023 before being postponed indefinitely by the government. Local elections are scheduled for June 2023.

Political indicators :

Economic data :

The Malian economy rebounded slightly in 2021 with GDP growth estimated at 3.1%, driven by recovery in the key sectors of agriculture and services. However, ECOWAS sanctions combined with the consequences of the war in

Ukraine on commodity prices have led to a slowdown in GDP growth estimated at 1.8% in 2022. The improvement in the terms of exchange that had prevailed since 2019, driven by the upward trends in international gold prices, eased in 2022, driven by an acceleration in oil prices. However, this was mitigated by the effects of ECOWAS sanctions on import flows, leading to a decline in the current account deficit to 7% of GDP while the decline in external financial flows accelerated in 2022. Budget expenditure, which had been accelerating since 2020 to respond to the pandemic and contain the socio-economic crisis, continued to increase in 2022, driven in particular by the wage bill and security expenditure. On the other hand, tax revenues fell in 2022 due to tax expenditures to contain inflation and the effects of ECOWAS sanctions on trade flows, leading to a stabilization of the fiscal deficit at 5.0% of GDP. In the short term, the priorities are to organize elections in accordance with the timetable agreed with ECOWAS for a return to democratic governance while pursuing reforms to improve public expenditure management and tax administration performance.

Debt Collections / Judgments : No negative information was found
Payment behaviour: Normal

CONCLUSION AND ADVICE

Comment

TMC is continuing its operations in its field. It owns and operates a dolerite deposit and prefabricated aggregates in the Kabaro Kati area, offering a full range of gravel products. The group is quite well-established and has a significant fleet of vehicles for its transportation needs. For more information and recent figures, we contacted our usual contact, Mr. Guindo, and are awaiting a response. The company inspires confidence. There has been no negative feedback from our sources. We advise continuing business at a moderate pace.

TOGUNA MINING CORPORATION is a medium-sized company with a good commercial reputation operating in Mali in the exploitation of quarries. To do this, it has an exploration and exploitation permit which can be located in the circle of Kati, on the outskirts of the capital Bamako. It has the logistics of the sister company TOGUNA MOTORS for the transport of products and the clientele is very diversified. Its share capital has increased from 1,000,000 XOF to 1,000,000,000 XOF in 2023 but we have not yet received the RCCM amendment promised by management. In addition, we note some differences between the figures produced for the 2022 financial year on the 2023 financial statements and those of 2022. According to our contact Mr. Guindo, the financial statements for the 2022 financial year were provisional and he promised us the certified version, which we are still waiting for. It is continuing its activities well and maintains good relations with its partners. We have not received any negative feedback on this subject. It has a fairly average financial base. Commercial relations can continue in a moderate manner.
