Acronym : CCIS SA
ACREMAC internal number : 3301
Phone 1 : +221 33 879 84 84
Adress : Route de Petit MBAO
P.O. BOX : 137
Fax : +221 33 854 81 95
Town : Dakar
Website : www.ccis.sn
Country : Sénégal
NACE Code : 2416 MANUFACTURING OF BASIC PLASTIC MATERIALS
Cell phone 1 : +221 77 651 52 52
Email 1 : ccis@arc.sn
Email 2 : contact@ccis.sn
Email 3 : ccis@ccis.sn
Main activity : Manufacture of plastics

Comment :

The company is located at the address indicated.
CCIS develops its activities in an area covering 50 thousand square meters.
The CCIS is certified on the ISO 9001 & ISO 14001 standards.

EXECUTIVE SUMMARY

Date created : Jan. 1, 1973
Equity : 4,973,180,000 XOF

Share capital : 1,969,550,000 XOF
Number of employees : 144
Turnover : 15,460,736,000 XOF
Net profit : 141,139,000 XOF
Legal form : SA

Comment :

In 2021, the financial structure is modest but orderly. The main basic ratios remain average. We lack visibility on recent figures on the subject.

RISK RATING

Analysis :

Organizational structure is acceptable.
Management is reasonably experienced.
No detrimental records found.
Financial performance is Fair.
Operational trend is steady.
No payment delays noted.

Interpretation :

Financial information is moderated. More caution advisable when considering granting credit. Smaller credits plus guarantee an advantage. A strict credit control policy applies

CREDIT LIMIT

Requested limit : 3,843,011.05 €
Limit recommended : 1,500,000.00 €

TREND

Commercial advice : 200- Positive business development

More information about the rating: 25 This company is considered to be a large company

SECTORAL ANALYSIS

Sectoral Analysis :

The PVC pipe sector is constantly evolving in Senegal. PVC tubes remain the flagship products in the field of construction, which favors their importation and their manufacture by local companies.

ACREMAC ADVICE

Strength :

Seniority, innovation, credibility with quality certification, good clients,

Weaknesses :

Short term dynamism :

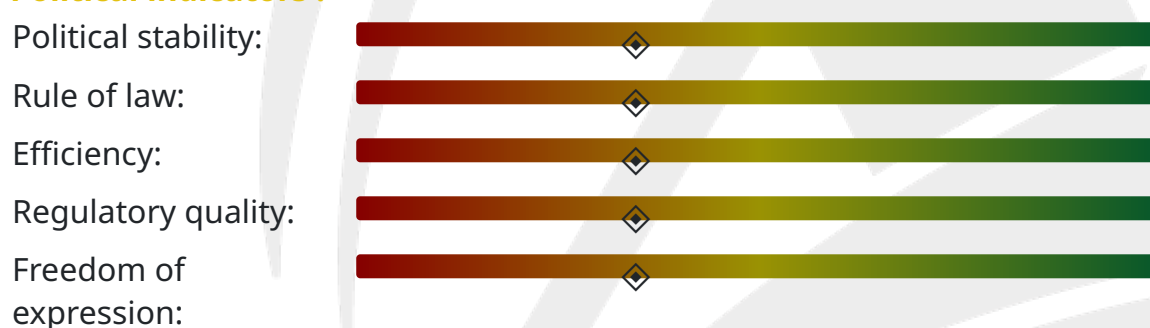

Potential short-term risks :

COUNTRY RISK

Political data :

Senegal is one of the most stable countries in Africa. The three political alternations since independence in 1960 have been peaceful. In power since 2012, President Macky Sall won a second (five-year) term in February 2019. The legislative elections of July 31, 2022 created an unprecedented situation in Senegal with a national assembly without an absolute majority. The ruling coalition, Benno Bokk Yakaar (Unity around the same hope), won 82 out of 165 seats, the five opposition coalitions sharing the other 83 with Yewwi Askan Wi (Liberate the people, 56), Wallu (Rescue Senegal, 24), Bok Guiss Guis (Same Vision, 1), Aar Senegal (Protect Senegal, 1) and The Servants (1). Senegal has so far been spared the violence that has rocked the region, but the actions of terrorist groups in neighboring countries and cross-border trafficking risk fueling instability.

Political indicators :

Economic data :

GDP in 2020 was \$24.9 billion in current terms. The gross national income (GNI) per capita was \$1,430 in 2020, making it a lower middle income country. Between 2014 and 2018, Senegal recorded annual growth above 6%. Real GDP growth stood at 0.87% in 2020 compared to 4.4% in 2019 and 6.2% in 2018. However, the momentum of the recovery is compromised by the conflict in Ukraine. Real growth is expected to slow from 6.1% in 2021 to 5% in 2022 as private consumption and investment decline due to higher food and energy prices and higher great uncertainty. Average inflation is expected to peak at 5.5% in 2022, due to trade disruptions exacerbated by conflict in Ukraine, with energy and food prices rising the most. The pandemic has significantly changed the economic outlook, affecting services - tourism and transport - and exports. Senegal reacted with containment measures and the establishment of an "economic and social resilience program" (PRES). However, the weakness of budgetary reserves and safety nets, the vulnerability of the health system and the weight of the informal sector create difficulties. Economic recovery is likely to be gradual. The reforms envisaged under the Emerging Senegal Plan (PSE) need to be deepened to return to the pre-pandemic growth trajectory. Services hold a preponderant place in GDP, while the primary sector - mainly agriculture - is the most dynamic engine of growth. The health crisis has delayed oil and gas exploration projects, which are only expected to contribute to revenue and exports around 2035.

Comment: The financial structure is modest but orderly. The main base ratios are average. Covid 19 has been an architect of the stagnation in business volume and results. In 2021, we see a lower impact of covid and the turnover increased by +43.72% and the net result by +188.91%. Equity is strong.

SCORE@ACREMAC

This score is automatically generated by bucrep through the summation of the following elements: local site, age of the company, payment behavior, commercial opinion, Nace code. The elements of the score grid were weighted according to their degree of importance in the risk calculation. Credit rating:

- 10- No risk
- 9- Very low risk
- 8- Low risk
- 7- Moderate risk
- 6- Acceptable risk
- 5- Moderately high risk
- 4- Significant risk
- 3- Significant risk
- 2- Very high risk of insolvency
- 1- Extremely high risk of insolvency
- 0- Insolvency/Collection procedures

Full description :The Compagnie Commerciale et Industrielle du Sénégal (CCIS) is a Senegalese company specializing in the manufacturing and marketing of PVC, polyethylene, drilled, corrugated and PPR pipes.

Purchases

- Import :**
- 2- FCA - Free-Carrier
The seller delivers the goods to the recipient designated and paid by the buyer. The transfer of risks is materialized during this operation. If the delivery is made on the seller's premises, he is responsible for loading the goods. If the delivery is made at another location, the seller is no longer responsible for unloading.
 - 5- DAP - Delivered At Place - Rendu au lieu de destination
The seller is responsible for the transportation of the goods to the agreed delivery point. He assumes the costs and risks up to this point. The buyer bears the unloading and import clearance.
 - 7- DDP - Delivered Duty Paid
The seller delivers the goods to the buyer having taken care of everything, including import customs formalities and payment of duties and taxes (Maximum obligation for the seller).
 - 9- FOB (Free on board)
The seller delivers the goods on the ship at the agreed port of shipment. The transfer of charges and risks takes place when the goods are on board the ship. The seller must clear the goods through customs.

History :

The CCIS was created in 1972.
In 2001, it was ISO 14001 certified after having implemented an environmental management system.
Also more than twenty years ago, it obtained ISO 9001 certification.

CONCLUSION AND ADVICE

Comment

CCIS is and remains a large company that has evolved in all areas and also follows technological innovations. It has a modern factory that allows it to have 20 product lines in order to satisfy customers from different sectors and different countries. In addition to colossal investments in equipment and machinery, CCIS has significant land capital. Indeed, its factory is built on an area of 50 thousand square meters.

It has a growing activity due to the significant demand given the construction sites and major works in Senegal (in terms of water, sanitation, telecommunications, roads, etc.).

The company, given its solid experience and historical presence, remains a leader in its field in Senegal.

It demonstrates credibility with its commercial and financial partners but also has a satisfactory payment history.

We are waiting to receive recent financial information to update. We have contacted management and our sources and are waiting.

Business relations can continue with the subject.
